

Naman Sharma

📍 CGC Jhanjeri ✉ namansharma10122004@gmail.com ☎ +91-9015351890 in aka-naman 🌐 aka-naman

Motivated undergraduate student with a strong foundation in computer science and a deep interest in cutting-edge research in Machine Learning, and Deep Learning. Hands-on experience with Large Language Models (LLMs), AI agents, and modern ML frameworks. Eager to explore emerging technologies and contribute to impactful AI-driven solutions.

Experience

AI/ML Research Intern

Jan 2026 – Present

Defence Research and Development Organisation (DRDO)

- Integrated AI-driven automation solutions to optimize internal operational workflows and streamline intra-departmental and inter-departmental communication processes
- Developed intelligent automation pipelines for reducing manual overhead, improving task execution efficiency, and enhancing information accessibility across teams
- Assisted in implementing AI-based systems for workflow optimization, document handling, and process automation within secure research environments
- Collaborated on practical applications of Large Language Models (LLMs) and AI tooling to improve organizational productivity and operational efficiency
- Tools Used: Python, LLMs, Workflow Automation, Data Processing, AI Integration

Education

Chandigarh Engineering College, Jhanjeri, Mohali

Sept 2022 – Present

Bachelor of Technology in Artificial Intelligence and Machine Learning

- GPA: 8.12/10
- **Coursework:** Neural Network, Machine Learning, Computer Architecture, Tableau, Statistical computing using R, Probabilistic Mathematics

Central Board of Secondary Education, Delhi

March 2020 – April 2022

Higher Secondary

- Percentage: 72
- **Coursework:** Optics, Electromagnetism, Quantum mechanics, Organic and Inorganic Chemistry, Calculus, Statistics, Standard Mathematics

Central Board of Secondary Education, Delhi

March 2020

Secondary

- Percentage: 82
- **Coursework:** Information Technology, General Science, Social Studies

Projects

PrivateVault: Air-Gapped Knowledge Retrieval System

github.com/aka-naman/PrivateVault 

- Engineered a self-hosted private document intelligence system enabling secure storage, semantic retrieval, and offline access to sensitive documents in air-gapped environments
- Built an end-to-end RAG pipeline with intelligent document parsing, embedding generation, vector indexing, and contextual querying for PDFs and structured files
- Implemented optimized ingestion workflows with metadata extraction, chunking strategies, and scalable retrieval architecture focused on privacy, low-latency search, and local-first deployment

- Tools Used: Docling, Python, Local LLMs, React, TailwindCSS

Facial Recognition System

github.com/aka-naman 

- Developed a high-accuracy facial recognition model utilizing deep learning techniques for identity verification.
- Optimized feature extraction and classification pipelines, reducing false positives and improving system efficiency.
- Tools Used: Python, TensorFlow, Hugging Face OpenCV, FaceNet, Pytorch.

Customer Segmentation

github.com/aka-naman/Customersegmentation 

- Developed a customer segmentation model using machine learning techniques to classify customers based on purchasing behavior and demographics.
- Applied Feature engineering, dimensionality reduction and K-Means clustering to enhance segmentation accuracy and insights.
- Tools Used: Python, Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn.

Training Experience

Machine Learning Training

June 2024 – July 2024

IIT Bombay's Mood Indigo

- Gained expertise in supervised and unsupervised learning, model evaluation, and feature engineering.
- Worked on real-world datasets, implementing predictive models and optimizing performance.
- Enhanced proficiency in Python, Scikit-Learn, TensorFlow, and data preprocessing techniques

Technologies

Machine Learning & AI: Deep Learning, Reinforcement Learning, Transformers, Generative AI, API's.

Natural Language Processing (NLP): Transformers (BERT, T5, GPT), LLMs

Frameworks & Libraries: PyTorch, LangChain, TensorFlow, Hugging Face, Scikit-learn, Numpy, Pandas.

Tools & Platforms: Linux, Docker, Git, Jupyter Notebook, VS Code, Google Colab
